

To Whom It May Concern

I am writing on behalf of Adam El Ghaib Bougrine who asked me if I could provide a letter of reference for his admission to your master's program in Space Science and Technology. I had the privilege of serving as the examiner for his bachelor's project, while he was enrolled at Linköping University as an exchange student. In short, I would describe him as someone who pays attention to correctness in theory, strong academic writing, and good ability to apply theory in practice.

Adam was given the objective to explore concepts of force control actuators for unmanned aircraft and during his project he demonstrated excellent understanding of the aeronautical subjects at hand and showcased the ability to apply them practically when implementing two different conceptual prototypes. This involved both mechanical design as well as Arduino programming. The prototypes were very successful and are currently awaiting to be tested in an unmanned research aircraft at Linköping University. Moreover, his academic writing skills were excellent as demonstrated in his well-organized and logically structured thesis. Adam also showed to be a diligent and proactive individual who collaborates effectively.

If you have any further questions, feel free to contact me.

Sincerely

David Lundström
